Project Title

DUAL MODE BICYCLE

Abstract:

The name of our project is “ Dual Mode bicycle “. It will be made up of two modes as Speed and Comfort. We have arranged the function of two bicycles which is normal one and recumbent into single bicycle. Our aim behind combining these two mode is to led the awareness about using bicycle to next level and to achieve this we think recumbent mode will more helpful.

As today’s fast generation need accuracy, aesthetic appearance and also comfortable approach and our project will going to fulfill all these required facilities and much more other too. Currently all the industries and also the government is much focused toward development of smart cities and this project is best suited to smart city concept.
