Group No: **13**

Guided By

**PROF. S.S.PATEL**

**SMT. S. R. PATEL ENGINEERING COLLEGE, UNJHA**

**Project Title**

**WHEEL RIM STRAIGHTENING AND INSPECTION MACHINE**

**Abstract:**

Now a day's accuracy is very important in Wheel Rim. Wheel Rim Straightening Device is use for Straightening a damaged Wheel Rims by pressure applied on a damaged Wheel Rim. But The Cost of the Wheel Rim Straightening Machine is very high. By Producing the equal pressure and change in the design to reduce the Cost of the Wheel Rim Straightening Machine. The Abstract of the project is, By using these types of components the cost of the machine is Reduce and also the weight of Wheel Rim Straightening Machine is Reduce with the Inspection process.
